

ELEMENTARY PROGRAMS

UPPER ELEMENTARY 4-6 GRADE; 9-12 YEAR OLDS

The Upper Elementary classroom provides the tools, materials, technology, and instruction to strengthen the older child's academic path. The Montessori curriculum remains a core element of daily instruction. Upper Elementary students are encouraged to complete independent research projects and develop collaborative work skills by participating in interdisciplinary group projects. Time management and social and emotional learning skills are fostered through community-building activities and the use of work journals. Art, music, whole health and wellness classes continue. In addition to overnight field trips, class wide day trips as well as students driven field trips support both curriculum and service learning opportunities.

2024-2025 TUITION: \$9,106

LOWER ELEMENTARY 1-3 GRADE; 6-9 YEAR OLDS

In the Lower Elementary classroom, movement and material driven learning experiences allow children to continue to explore the Montessori curriculum at their own pace. The Great Lessons presented each year establish the framework for the integrated study of subjects in science and cultural studies, including botany, zoology, physics, chemistry, and history. Enrichment opportunities include art, music and whole health and wellness. Work plans and mindfulness meetings allow students to balance academic, social, and emotional growth in the classroom. Each year, the class has one overnight field trip in addition to day long field trips.

2024-2025 TUITION: \$9,106
